Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Remarks

This Office Action is responsive to applicant's amendment filed August 14, 2003.

Claims 1-14 are pending.

The objection to claim 8 under 37 CFR 1.75(c) for failing to further limit the parent claim has been withdrawn in view of applicant's clarification on the record that the calcination of the impregnated porous YSZ layer is an *additional calcination step*. (emphasis as submitted, reply page 8)

The rejection of claims 1-3, 7 and 8 under 35 U.S.C. 103(a) based on Rossing et al., Soma et al. and Kawasaki et al. has been obviated in view of applicant's amendment to independent claim 1 now reciting that the YSZ layer forms an anode electrode.

Allowable Subject Matter

Claims 1-11 are allowed.

As set forth in the prior Office Action, the primary reasons for allowance is a porous matrix material/powder mixture as part of an electrode structure, i.e. an anode electrode, and not an electrode support structure or the electrolyte itself as shown in the prior art.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 1745

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 09/914,638.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the '638 application recite impregnating the anode layer with a Cu-containing salt solution.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
